Toshiba Graphics Card Repair

If your Toshiba is suffering from any kind of graphics problem including distorted or flickering video and images then the last thing you need to do is panic. It may be experiencing a NVIDIA and AMD graphics chip fault or failure, but luckily the team at Laptop Store is able to resolve any type of NVIDIA and AMD issue. It is always best to consult an expert in order to correct the disturbance and prevent further damage to the machine. Take advantage of the comprehensive diagnosis and repair service provided by Laptop Store today!

We offer repair services for all Toshiba NVIDIA & AMD graphics chip reflow and rework requirements. We are able to swiftly solve the problem and enhance the performance of all models, including:

- Toshiba Satellite
- Toshiba Satellite Pro
- Toshiba Portege
- Toshiba Qosmio

Toshiba and many other computer brands use NVIDIA & AMD Technology and have previously suffered from faulty chipsets. This is usually due to the fragile die/packaging material set, which is upset by the everyday temperature fluctuations within the computer. Unfortunately, it normally cannot be avoided. When the graphics processors overheat, the solder in the chip will stop making the proper contact with the motherboard and your Toshiba may start to display .

Toshiba Graphics Card Repair:

You may be having NVIDIA chip problems if you are experiencing:

- Duplicate images
- Random or unusual characters on the screen
- Horizontal, vertical or jagged lines appear on the screen
- Video freezes
- Distorted or scrambled video
- Flickering action
- Random rebooting or shut down
- Blank video or screen

The graphics processors and chipsets overheating, the solder can become dry and stop making the proper contact with the motherboard. This is merely due to the regular temperature fluxes of the computer and in most cases cannot be avoided.

The Laptop store team of capable technicians and engineers have years of practical experience. They also aim to provide friendly customer service at all times, since they fully understand the confusion and frustration imminent with NVIDIA graphics problems. We guarantee to provide accurate quoting and distinct explanations to our customers to help with a more straight-forward, painless repair process. With our state-of-the-art BGA rework tools and facilities we are able to perform both basic and more complex repairs on all Samsung models in the most time-efficient, affordable and secure manner possible.
